Official delegate reference manual

Nath Valley School ISMUN paperwork handbook

Letter from the secretariat

Greetings delegates,
This document will contain the various types of paperwork that are to be made for ISMUN. With it we have attached some examples that can be used as reference. As always please feel free to reach out to us if there are any doubts, you may also reach out to your EB with the gmail provided to you in the committee specific background guides for any further doubts.

Until october,

The secretariat,

ismunnathvalleyschool@gmail.com

Draft resolution

A draft resolution is a formally written document that is to provide solutions upon the main agenda issue of a committee, it is generally considered a final document and signals a successful close of committee.

Draft resolution may be introduced when it has the required number of signatories as well as the approval of the Director. The primary sponsors and secondary sponsors of a resolution are known as authors and co-authors, respectively. The number of authors and co-authors of a resolution in a committee is decided by the Director. It is important to note that being a signatory to a resolution in no way implies support for the resolution; it simply expresses the wish to discuss that draft resolution before committee. ISMUN has a single resolution policy, which means that once a particular resolution has been passed, all others will automatically fail. It is to be noted that a resolution can be named anything as per the delegates wish.

Example of a Draft resolution

Resolution Blueberry Cheesecake 5.0: The Final Slice

Committee Name - The Historic Security Council
Topic - Situation in Abyssinia of 1936
Author - Egypt
Co Authors - The Ethiopian Empire, Republic of Turkey
Signatories: The Kingdom of Italy, Ethiopian Empire, Republic of Turkey, Kingdom of Egypt, United Kingdom, USA, French Republic, Spain, Austria

United Nations Security Council,

Reaffirming the commitment to the Purposes and Principles of the Charter of the United Nations,

1. Takes Note of the Ethiopian Empire's commitment to stability which is necessary for peaceful and friendly relations among Member States of the United Nations based on respect for the principle of equal rights and self-determination of peoples;

2. Encourages cultural and religious cooperation programs under the mandate of the United Nations Educational, Scientific and Cultural Organization (UNESCO) to preserve the Italian Republic's heritage;
3. Emphasizes that the fulfilment of the Principles of the United Nations requires the establishment of a just and lasting peace in the Ethiopian Empire;
4. Calls for the United Nations to take collective measures to mediate peace efforts for the aforementioned dispute;
5. Proclaims that the western bloc is the official winner of the War, pertaining to the fact that:

   a) The Civilians of the western bloc are Protected under operation "Ghost Plan" and the remaining civilians remain on the hazardous surface;

   b) The Western Bloc has infiltrated the USSR and Yugoslav territory;

   c) The other blocs have lost their nations, the Fascist Bloc has lost their modern weaponry and land;

6. Requests all nations under the United Nations Security Council to recognize the impact on the environment caused by the war, and take action through;
   a) Joining a cause started by the Republic of Turkey, Egypt, United Kingdom, United States of America and France stating that:
      i) Each nation involved in the cause shall spend 4% of their GDP on extraction of chemicals in the water bodies across our planet;
   b) Each nation shall contribute a group of scientists to work on the purification of water;
7. Designates basic resources to all other members of the western bloc which consists of :-
   a) Food (bread and rice)
   b) Water (Purified water transported across sea),
   c) Clothes;

8. Creates shelters are being made across the Western Bloc, every country in the western bloc has agreed to dedicate 0.7% of their GDP to the building of shelters.
9. Establishes a committee, the Environment on Land Monitor(ELM):
   a. The committee will investigate the ozone levels in the soil,
   b. The committee will contain of the top scientists of each major country and will, research on a counter acting agent to resolve the matter,
10. Urges for trees to be planted on a large scale across Approves the enacting of Subterranean-to-Surface Transition Protocol (SSTP) on the controlled phased repopulation of surface hemispheres from existing, bunkerised populations of the Western Bloc, a) The operation will follow integrated management rules
    i) Formation of Joint Surface Reclamation Taskforce (JSRT): an independent, UN

supervised scientific body to ensure all monitoring and soil recovery activities occur,
ii) Phased Soil and Radiochemical Testing Protocols: utilizing remote-controlled, radiologically shielded deep core exploratory rovers on 1, 5, and 10-meter strata and returning samples to detect surface ppm levels of Strontium-90, Cesium-137,
iii) Atmospheric and Hydrological Scanning: launching weather balloons into each region and establishing low orbit observation micro-satellites to conduct airborne particulate readings in unison with automated microfluidic probes for groundwater purity assurances to confirm absolutely no bleed-through contamination,
iv) Closed-loop Agricultural Bio-Assays: erect portable sealed atmospheric test spheres atop un-processed surface earth and begin monitoring in triple life-cycle generations for radiation induce cell degeneration via three seed-crop rotations,
v) Minimum Quantifiable Reentry Metrics: absolute surface abandonment and restoration authorized only when average gamma count is confirmed at 0.25 uSv/hr (or less) for 365 contiguous days, with all food chain contact confirmed radioactive-free,
Standardization of Subterranean Infrastructure: ensure and align, with all due speed, all Western Bloc life support systems, hydroponics, and geothermal output at pre-reclamation status to ensure critical resource continuity until all entry benchmarks; The western bloc will accept further Humans into the ghost town, to ensure their safety and wellbeing, and they will be provided with, Basic Necessities

11. Deplores in the strongest terms the aggression by the Kindom of Italy against the Ethiopian Empire in violation of Article 2 (4) of the Charter;
12. Requests the Secretary-General to report to the Security Council on the implementation of this resolution within 45 days and to provide regular updates on the situation on the ground;
13. Further takes note of the actions taken by the Union of Soviet Socialist Republics, and the German Reich in the ongoing international armed conflict;
14. Demands an immediate halt to the hostilities, in particular the use of air strikes
15. Resolves to remain actively seized of the matter;
16. Supports the planting of trees on a large scale across the western bloc.

Working Papers

Delegates may propose working papers for committee consideration. Working Papers are intended to aid the committee in its discussion and formulation of resolution clauses and need not be written in resolution format, though it is advisable and more effective to do so. Working papers act as a precursor to the process of resolution writing, being concise versions of resolutions themselves. They do not follow a particular format and require no signatories to be presented before committee but should aim to cover all subtopics of the agenda discussed hitherto since they act as a framework for the resolution.

Example of a working paper

WORKING PAPER 1.0

AGENDA – Deliberation on the possible amendments to legislations pertaining to forced conscription.

AUTHOR – Ukrainian Soviet Socialist Republic

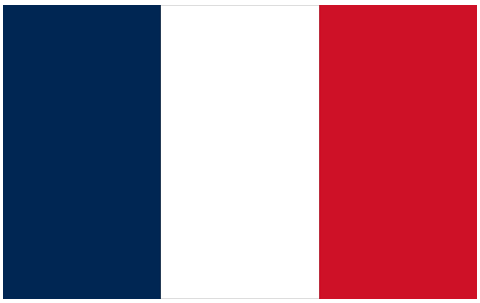

POTENTIAL SOLUTIONS -

1. **Establishing a Global Conscription Watchdog:** Creating an independent international body specifically tasked with monitoring conscription practices worldwide, would be extremely beneficial. This organization would gather and verify reports of forced conscription, particularly focusing on regions with ongoing conflicts. It would work closely with local NGOs, the United Nations, and other international entities to ensure transparency and accountability.
2. **National Legislation Alignment:** Encourage countries to align their national conscription laws with international human rights standards. This can be facilitated through technical assistance programs, where legal experts help countries draft and implement laws that protect against forced conscription and ensure voluntary military service.
3. **Targeted Sanctions Against Perpetrators:** Implementing targeted sanctions against individuals, military units, and government officials found guilty of enforcing forced conscription. These sanctions should include travel bans, asset freezes, and restrictions on international military assistance. This would hold the perpetrators accountable and set an example

Position paper

A position paper is a pre-committee documented to be submitted to the EB. This document will consist of a country's stance on the agenda, what they plan to introduce in committee, their foreign policy and how they plan on addressing the issue at hand. This is meant to help the EB prepare for the committee flow according to the preparation of the delegates.

Example of a position paper

Committee: Historic Security Council

Topic: The Abyssinian Crisis of 1936

Country: The French Republic (*République française*)

School: Nath Valley School

Delegates Name: Arvika Patil

Statement of the problem:

"War is the continuation of politics by other means." The Republic of France, as a permanent member of the Council of the League of Nations, recognizes this issue of extreme importance; as we stand on the precipice of an international catastrophe which may dismantle what we know as the architecture of global peace. We do not view this crisis as an isolated dispute but as a direct threat to European stability and security. Italy's invasion of Ethiopia is in clear violation of Article 16 of the Covenant, in consideration of the usage of chemical weapons against the

Ethiopian soldiers and civilians. This also furthers their disdain for international law especially the Geneva protocol of 1925 which they are a signatory to.

At its core, this crisis poses the question, if sovereign states can or cannot be erased from the map through military force. Here, Ethiopia, has been subjected to uncalled for aggression from a fellow League member state. Incidents such as The Battle of Adwa can no longer be manufactured as excuses and defenses to conceal the true reality, which is colonial ambition. Normalising this type of aggression will only lead to sovereignty becoming null and void and losing its essence.

It must also be highlighted that German troops have remilitarised the Rhineland which is in itself violating both: the Treaty of Versailles and Locarno Treaties. Observing the League of nations' paralysis and non-action over Ethiopia, Germany has concluded that these treaty obligations are not enforced against heterodoxical powers.

If Italy is allowed to go forward with their conquest of Ethiopia without real consequences, it will be interpreted as permission by other states like Germany, that these expansionist desires are not out of reach. We must deliberate and decide if collective security does in fact hold value in the face of pre established dominance and power.

Foreign Policy:

Even though we have long championed peace and security, it is time to face these threats of aggression and stand up in defense as required. German troops are now occupying territory on our border, threatening our national security directly. We will pragmatically calculate all our decisions so that we do not have to endure any devastation, especially unprovoked. This does not mean that we will not be able to fulfill our dual obligations of the Covenant's principles and

maintaining alliances within the European continent for security. Fulfilling our obligations should not be perceived as callousness towards Ethiopia or be seen as support to facism. We understand the complexities of maintaining order in colonial territories, but that does not permit flagrant acts of conquest, specifically against a fellow League member. We reaffirm that our primary responsibility remains, the security of our own borders followed by the stability of our allies. We will not allow a precedent of lack of consequence against revisionists to be established here, and stick with our core values as a republic.

Possible solutions:

As always we remain committed to constructive diplomacy and put forth the following solutions:

1. We advocate for amendments and expansion in the sanctions of the League of Nations so that petroleum products, coal and steel can also be included. These are the resources which sustain military campaigns and restricting their flow or controlling it will materially constrain the war efforts of both Italy and Germany. We would like to establish a commission of selective states, to monitor compliance and prevent member states from circumventing sanctions through covert operations.
2. The same commission must also document all violations and findings to the Covenant. If any of the violations are proved true, the member states must face proportional punishment ranging from suspension from League bodies and referrals to international tribunals. This will also establish taking accountability, making it a norm without the requirement of any military confrontation.
3. We propose a protocol that will clarify Article 16 and its obligations which are automatic. It will solidify the fact that aggression against any fellow member state will trigger

mandatory oil sanctions, financial restrictions and suspension of trade to that specific member. This will prevent paralysis.

4. Finally, we encourage diplomatic engagement with non-league powers, like the United States. American cooperation on oil sanctions will be essential. We will pursue bilateral discussions with Washington to align policies as we understand that global security and stability requires participation that extends beyond Geneva.

We place our complete belief that if these measures are implemented collectively, we can uphold international law and maintain the credibility of the League of Nations.

Communiqués and Directives

A communiqué or a directive is a document that is meant to issue how information flows. They are issued by delegates to the EB individually or by a bloc so that the flow of committee is more interactive and according to the interest of the delegates. The EB may then ratify it, which means that it might somewhere be included in the further committee proceedings.

These can be either covert, done in secret, where the submission and ratification of the document remains between the EB and delegate.
They can be overt, where they are publicly read out and ratified in the presence of all delegates so that the entire committee is aware of a delegate's intentions.

Example of a covert communiqué submitted individually

FROM: The Delegate of the Republic of France
TO: Minister of National Defense and Director of the Deuxième Bureau
This message is to be transmitted in secret.

This message is top secret. This message is to be transmitted via the encrypted diplomatic cipher 'TRICOLORE'. Retain all details, share them with no one, and burn all physical evidence of this order. Anyone continuing to read further must acknowledge that they are now willingly putting their lives at stake.

Instant elevation of increase in border and intel security is required. This includes, but does not limit to, Garrison's position along the maginot line, various cables to Geneva, and multiple military transmissions stations effective immediately. Ensure that this is carried out by the most elite personnel with unmatched skills in border defense, negotiations and signal intelligence; they must also sign an agreement which is punishable by life imprisonment at devil's island or immediate execution upon violation of the document. No additional information is to be provided to these commandos, and they must not be aware of the identities of their field mates. The french tricolour must be visible on their uniform with hidden opium tablets in case they are captured.
We will be having 2 task forces-

UNIT R36: immediate mobilization along the franco-german border, securing hypogeums at coordinates 49° 24' 20.0" N, 5° 48' 10.0" E (Fort de Fermont) and coordinates 49° 03' 00.0" N, 7° 34' 00.0" E (Fort Simserhof).
U**NIT 077:** establish cover intelligence and communication station beneath Fort de Vincennes at 48° 50' 34.0" N, 2° 26' 09.0"

The following operations are to be carried out by the task forces-

1. Defense- Operation Maginot: This will be a direct response to German troops who are illegally reoccupying the demilitarized Rhineland. On the morning of 7th March 1936, UNIT R36 must boost Maginot lines to alpha level. There should be no offensive incursions to German areas without cabinet approval, however any breach of the French border must be repelled with immediate lethal force. Transmit a report including german troop density.
2. Offense- Sanctions: Instruct all diplomats in Geneva to table an emergency motion before the council to expand article 16 sanctions against Italy to embargo petroleum, coal and steel. Publicly condemn Italy's deployment of mustard gas in Abyssinia. Simultaneously, submit a report on the USA and their trade with Italy for League voting alignments.
3. OPERATION CHRONOS: interpret the cryptic message with timestamp [28 NOV 1990 / 16:22 PM]. The exact transcript reads: "If you're seeing this message, it means the timeline is about to collapse. I am from the year 2071, and I'm a member of the Time Variance Authority. This message is to all international leaders and members of the international community. I haven't got much time, but listen closely. The apocalypse is coming. This committee is not what you think it is. Please save us. Please!" Determine if there have been any other such anomalies in the timeline, analyse the syntax, vocabulary, and cadence with all existing political figures to determine the origin country of this messenger.
4. **RÉPONSE ÉCHO-PASSANT**: attempt to reconstruct and replicate the exact electromagnetic frequency profile of the existing video. This must be done on a need to know basis. Wait for a reply, and on receiving one keep it secret from the nations until the time is right to implicate it as a call for action.
5. **OPÉRATION LE MIROIR BRISÉ:** Instruct the "defect Italian" official to reveal "conspiracies" to the Italian heads including "plans" to "assassinate Mussolini" and "British ploys" to "invade Italy". This convinces the Italian government that they are being lied to, leading them to divide their resources. This allows an opening to further confuse the heads by implying that the "defect italian" was German. Complicate the relations of Italy as much as we can to ensure they are left without backup.

You must make haste with all these operatives, specifically the ones highlighted as they are what will control the direction of how the world will progress with the various situations at hand. You

have been given a chance to be carved into the glorious pillars of French history. You will be remembered as a saviour. The future is not in the stars, it is in your hands. Make it French.

Liberté, Égalité, Fraternité

Action order or Crisis sheet (specific to crisis committees)

Action orders are very similar to communiqué's. They are submitted to the EB by delegates to detail what actions they wish to be taken in the committee and have some control over how the committee flows, if these are ratified, then the crisis proposed by the delegates will take place in committee. This also then increases their relevance in the committee.

These can be either covert, done in secret, where the submission and ratification of the document remains between the EB and delegate.
They can be overt, where they are publicly read out and ratified in the presence of all delegates so that the entire committee is aware of a delegate's intentions.

Example of an overt action order submitted by a bloc

Action Order "NUTELLA"

Ethiopia

1. Mutually Assured Destruction - A set of triggers throughout all countries of the Western Bloc will be on active alert throughout the war. As soon as these triggers, sense a Nuclear Weapon entering the airspace over said country, the nuclear weapons equivalent to 5 times the number of megatons of nuclear warheads dropped on us.
2. The Ethiopian Air Arm, along with the Atlantic Pact strategic wings, will conduct a three-day sustained bombardment over the approaches to Italian garrison concentrations in the northern highlands, launched from Gondar and Bahir Dar forward fields.
3. A set of 500 balloons with small LED lights at structured points on the balloons will be set out into the Italian Alps. These will have 4 green LEDs and 1 red LED trying to signify the 4 propellers of a drone and the main artillery of the drone. These balloons will be released right next to the camps of the fascist bloc near the mountains and will make the enemy believe we have used multiple high military attack drones which will instantly kill them. Scared for their lives, the

regiments will flee letting a set of 10,000 troops from the Ethiopian-American Regiment which will take over the Alp region

4. Ethiopian engineers using American space shuttle tile technology and French aerogel manufacturing create a massive transparent dome over the Fulda Gap and the region of France, Ethiopia, Turkey and the United Kingdom where the Soviets will launch the ground invasion. When Fascist or Iron Unionists artillery fires, the shells impact the aerogel and embed themselves without detonating, while "acoustic lenses" focus the sound of the impacts back at Soviet positions at 180 decibels, causing crews to bleed from their ears and abandon their guns, believing they have fired on an impenetrable force field. THIS WILL ESSENTIALLY RENDER ANY SMALL ARMS OR ARTILLERY FIRE IN EITHER OF THESE REGIONS USELESS AS IT WOULD GENERATE A SOUND OF SUCH HIGH-DECIBEL THAT IT WOULD CAUSE THE TROOPS OF THE EASTERN BLOC TO EITHER FLEE OR GO DEAF.
5. In response to sustained Fascist Bloc aerial and satellite surveillance, Ethiopian forces will deploy thermal-masking camouflage and deception measures across key positions in the highlands and along the frontier, using heat-dissipating netting to defeat infrared reconnaissance, decoy heat sources to draw and mislead targeting systems, and terrain-blending engineering to conceal reinforced positions from satellite and aerial imagery. Decoy equipment and false radio traffic will further degrade the reliability of Fascist Bloc targeting data.

6. Ethiopia will shift its population and infrastructure underground and establish the “Sub-terrainian Ethiopian Empire.” This is to ensure two things: a) we are shielded against any future attack from the enemy blocs.

b) we can tunnel pathways to strategic areas in enemy territory, escaping detection and wreak havoc.

7. We will use the Silent Choir to cause panic in the Italian government and impact Ricci. From then a false order will be carried out by Ricci. We will force him to commandeer the use of the “Ghost Bomb” on Rome, the centre of Italian forces.

   a) In the event they use their Iron Dome, the bomb will be reflected back to where it was released from, therefore sending it back to Rome.
8. France in collaboration with the United States of America shall invade Austria using: a) 200.000 active French troops

   b) 130,000 American troops

   c) MAS-36 bolt action rifles, Hotchkiss M1914, Renault R35 tanks, Somua s35, Devoitine D.500

   d) M1919 browning, M2 Light Tanks, Peashooter, Curtis P-6E Hawk
9. Turkey in collaboration with Egypt have militarised the following straits, restricting access to the fascist and Iron Pillars
   a) Bosphorus Strait
   b) Dardanielles Strait
   c) Suez Canal
10. Ethiopia will make use of our sub-terrainian dominion to set up major explosions in the dormant volcanoes of Vesuvius, Campi Flegrei, Vulcano, Ischia, Lipari, Salina, Ferdinandea, and Pantelleria. This will considerably hamper the enemy’s efforts against us.

11. Ethiopia will make use of psychological warfare to wreck our enemy. They may have the Black Beetle but we will use tabloids to publish sensational images of Italian cities being razed to the ground and publish stories such as "DO YOU REALLY THINK IT IS WORTH IT?"
12. In the Art of War it is written, "an army without its provisions and bases of its supply is lost." That is the reality of all combat. Therefore, Ethiopia shall attack the supply lines of the enemy so their reinforcements are cut off.
13. Egypt will be Deploying **the Western Desert Mobile Force**
    a. The Ministry of War shall constitute an emergency **Western Desert Mobile Force (WDMF)** under a single Egyptian field commander.
    b. The force shall consist primarily of:
       i. Egyptian infantry battalions;
       ii. cavalry and mounted reconnaissance detachments;
       Iii. machine-gun companies;
       Iv. field-artillery detachments;
       V. engineer companies;
       Vi. medical detachments;
       Vii. motor transport columns;
       Viii. desert reconnaissance units.
    c. The force shall initially concentrate around the **Mersa Matruh–Alexandria axis**, rather than dispersing the Egyptian Army throughout the country.
    d. Secondary detachments shall operate toward the **Siwa Oasis** and western desert approaches to prevent an enemy from bypassing the principal coastal defensive corridor.

15. **Authorizes the Egyptian Army to conduct offensive reconnaissance and military interdiction operations throughout the Western Desert** against hostile forces threatening Egyptian territory, with the purpose of discovering enemy movements, disrupting military logistics and preventing hostile formations from approaching the Nile Valley without warning;

a. Egyptian cavalry, armoured reconnaissance detachments and available army-cooperation aircraft shall be employed to identify hostile troop concentrations, military transport movements, supply depots and forward positions before those formations can threaten Egyptian territory.
b. Egyptian commanders shall prioritize military targets whose disruption would materially reduce an enemy's ability to conduct operations, including military supply concentrations, transport infrastructure, communications facilities and forward military headquarters, rather than directing deliberate attacks against civilian population centres.
c. Reconnaissance detachments operating beyond the principal Egyptian defensive positions shall maintain continuous communication with their parent formations and shall return intelligence concerning enemy strength, direction of movement and logistical condition to Egyptian headquarters as rapidly as communications technology permits.
d. Any offensive operation undertaken by Egyptian forces shall have a clearly defined military objective and withdrawal arrangement, preventing comparatively small Egyptian formations from being unnecessarily destroyed in prolonged engagements against numerically superior enemy forces.

16. **Orders the Egyptian naval authorities to adopt an active maritime security posture throughout the Mediterranean approaches to Egypt and the entrances to the Suez Canal**, integrating Egyptian naval reconnaissance with allied Western Bloc naval intelligence;

a. Egyptian naval and coastal observation personnel shall monitor military shipping approaching Alexandria, Port Said and Suez and shall immediately report suspicious concentrations or movements to Egyptian and allied headquarters
b. Egypt shall exchange information concerning hostile military vessels with allied naval commands so that the Kingdom does not operate in isolation from the wider Western Bloc maritime intelligence network.
c. Egyptian authorities shall distinguish between hostile military activity and neutral commercial shipping, ensuring that Egyptian military measures do not unnecessarily interfere with legitimate neutral commerce.
d. Should hostile naval forces threaten Egyptian territory or the Suez Canal, Egyptian commanders shall coordinate with allied naval forces to establish a unified response under the applicable rules of war.
e.

17.**Establishing a national Egyptian air-raid defence system protecting Cairo, Alexandria, the Nile Delta, Port Said, Ismailia and Suez against hostile aerial attack**, recognizing that the concentration of Egypt's population, government and infrastructure along the Nile makes aerial bombardment an especially serious strategic vulnerability;

a. Egyptian authorities shall establish organized air-observation posts around major cities and military installations, with observers reporting aircraft movements through telephone, telegraph, wireless or courier systems available in 1936.
b. Municipal authorities shall designate emergency shelters, medical stations, firefighting units and evacuation routes before any hostile aerial campaign begins, thereby preventing military authorities from having to improvise civilian protection during an attack.
c. Military aircraft, ammunition, fuel and other critical matériel shall be dispersed among multiple locations wherever practicable so that a concentrated aerial attack cannot eliminate Egypt's military capability through the destruction of a single installation.
d. Egyptian military authorities shall coordinate aerial warnings with allied forces operating from Egyptian territory, allowing aircraft and ground forces to receive warnings before hostile formations reach strategically important installations.

Target: Madrid and Strait of Gibraltar- The United States will launch an attack on Spain using a fleet of 5 Martin B-10B aircrafts:

- The attack will be launched from Langley Field Virginia, a major Army Air Corps base and the base of the General Headquarters Air Force
- The aircrafts will be carrying 3 x .30-cal MG each along with 2000 lbs of bombs each
- Two attacks will be carried out, one on Madrid and the Strait of Gibraltar.

Paperwork for Indian committees

INTRODUCTION TO LEGISLATIVE BUSINESS

In the Parliamentary system of India, the primary function of the Lok Sabha (House of the People) is the enactment of legislation. A proposal for a law is introduced in the House in the form of a **Bill**. When passed by both Houses of Parliament, the Lok Sabha and the Rajya Sabha, and assented to by the President of India, it becomes an **Act of Parliament**.

KEY RULE OF ORDER: CLASSIFICATION OF BILLS

Bills introduced in the House are classified into two broad categories: **Government Bills** (introduced by Ministers) and **Private Members' Bills** (introduced by any Member of Parliament who is not a Minister). The procedure outlined herein governs both categories with procedural distinctions noted.

CLASSIFICATION & TYPES OF BILLS

Delegates serving as Members of Parliament must structure their proposals according to the constitutional classification of the Bill under consideration:

Type of Bill	Constitutional Scope	Notice & Special Requirement
Ordinary Bill	Pertains to any matter other than financial or constitutional amendments (Articles 107 & 108).	7 Days' Notice (Government) / 1 Month's Notice (Private Member).
Money Bill	Deals exclusively with taxation, government spending, borrowing, or Consolidated Fund (Article 110).	Requires prior recommendation of the President. Lok Sabha exclusive.

Financial Bill	Contains general legislative provisions along with financial matters (Article 117(1) & (3)).	President's recommendation required for consideration under Class I/II.
Constitutional Amendment Bill	Seeks to amend, vary, or repeal any provision of the Constitution under Article 368.	Requires Special Majority (2/3 members present & voting + 50% total strength).

FORMAL NOTICE & PAPERWORK FOR INTRODUCING A BILL

A delegate intending to introduce a Bill must give formal written notice to the Executive Board of the Lok Sabha. Under Rule 64 and Rule 65 of the adapted *Rules of Procedure and Conduct of Business in Lok Sabha*, every Bill must be accompanied by full statutory documentation.

Required Documentation Checklist

1. **Notice of Motion for Leave to Introduce:** Formal application requesting time on the Parliamentary Order Paper.
2. **Text of the Draft Bill:** Organized into Enacting Formula, Preamble (if any), Short Title, Clauses, and Schedules.
3. **Statement of Objects and Reasons (SOR):** A clear, concise explanation of the necessity, underlying rationale, and policy objectives of the proposed law.
4. **Financial Memorandum:** Mandatory if the Bill involves expenditure from the Consolidated Fund of India, outlining financial implications.
5. **Memorandum Regarding Delegated Legislation:** Mandatory if clauses authorize the Executive to draft rules, regulations, or sub-legislation.

OFFICIAL FORMAT: NOTICE OF MOTION FOR LEAVE TO INTRODUCE

Delegates submitting a Legislative Bill must format their formal notice according to the official standard shown below:

FORM LS-LEG-01: NOTICE OF MOTION FOR LEAVE TO INTRODUCE A BILL

To,

The Executive Board,

Lok Sabha, ISMUN 4.0,

Nath Valley School.

HON'BLE SPEAKER,

I give notice of my intention to move for leave to introduce a Bill further to provide for [Brief Statement of Objective, e.g., the Maintenance of Public Order and Regulation of Assemblies] in the House during the current Session.

I enclose herewith:

1. Three copies of the draft Bill in English/Hindi. 2. A Statement of Objects and Reasons signed by me. 3. Financial Memorandum under Rule 69.

4. Memorandum on Delegated Legislation under Rule 70.

Yours faithfully,

Signature:

_____

Name of Member: [Delegate Name / Constituency]

Division/Seat No: [Assigned Division Number]

Date: [DD/MM/YYYY]

DRAFTING THE BILL: OFFICIAL STRUCTURAL TEMPLATE

The draft text of the proposed legislation must adhere strictly to statutory parliamentary draftsmanship standards. Below is the mandatory structural template for a Legislative Bill in the Lok Sabha:

FORM LS-LEG-02: TEMPLATE OF A DRAFT LEGISLATIVE BILL

THE [NAME OF THE BILL] BILL, [YEAR]

(BillNo.

_____

of [Year])

A

BILL

to [Long Title stating the primary aim, e.g., establish a regulatory framework for peaceful assembly and civil liberties].

BE it enacted by Parliament in the [Seventy-Seventh] Year of the Republic of India as follows:—

PRELIMINARY

1. Short Title, Extent, and Commencement.

—

(1) This Act may be called the

Act, 20

.

_____

____

(2) It extends to the whole of India.

(3) It shall come into force on such date as the Central Government may, by notification in the Official Gazette, appoint.

2. Definitions.

— In this Act, unless the context otherwise requires,

—

(a) "Authority" means the Regulatory Body established under Section 4;

(b) "Prescribed" means prescribed by rules made under this Act.

CHAPTER II: CORE PROVISIONS & ESTABLISHMENT

3. Regulation & Standards.

— (1) No entity shall operate without compliance...

STATEMENT OF OBJECTS AND REASONS

[Paragraph 1: Background and context of the problem]

[Paragraph 2: Detailed policy goals and justification]

[Paragraph 3: Summary of key clauses and desired outcomes]

PARLIAMENTARY RULES GOVERNING AMENDMENTS

An amendment is a formal proposal to alter the text of a Bill under consideration. Under Rules 79 to 85 of the Lok Sabha Rules, an amendment must satisfy the following conditions of admissibility:

Relevance: An amendment must be strictly relevant to the subject matter of the Bill and within the scope of the clause to which it relates.

Consistency: It shall not be inconsistent with any previous decision of the House at the same stage.

Frivolousness: The Speaker may disallow amendments that are unintelligible, vague, or frivolous.

Negation: An amendment that is tantamount to a direct negative of the Bill or clause is out of order.

OFFICIAL FORMAT: NOTICE OF AMENDMENT TO A BILL

When moving amendments during the Second Reading (Clause-by-Clause consideration), delegates must submit formal written notices to the Executive Board using the prescribed template below:

FORM LS-LEG-03: NOTICE OF AMENDMENT TO CLAUSES OF A BILL

To,

The Executive Board,

Lok Sabha, ISMUN 4.0,

Nath Valley School.

HON'BLE SPEAKER,

I give notice of my intention to move the following amendment(s) during the Clause-by-Clause consideration of Bill No.

of 20

_____

___ [Name of the Bill]:

CLAUSE 3

1. By [Delegate Name/Constituency]:

Page 2, line 14,

—

for "shall be liable to a fine of five lakh rupees"

substitute "shall be liable to a fine not exceeding ten lakh rupees or

imprisonment for a term up to one year, or both.
"

CLAUSE 5 (NEW)

2. By [Delegate Name/Constituency]:

"5A. Appellate Authority.

— Any person aggrieved by an order may prefer an appeal within sixty days.
"

Yours faithfully,

Signature:

_____

Member Name: [Delegate Name / Constituency]

Date: [DD/MM/YYYY]

FLOOR SPEECH & VOTING PROTOCOL FOR AMENDMENTS

During the Clause-by-Clause stage, the Speaker calls each Clause sequentially (e.g., *2 stand part of the Bill"*). Delegates must adhere to the following procedural workflow:

"The question is that Clause

1. **Moving the Amendment:** When called by the Chair, the delegate rises and states: *"Sir/Madam, I move*
Amendment No. [X] standing in my name.
"

2. **Debate:** The delegate is permitted a brief speech restricted strictly to the merits of the specific amendment.

3. **Disposition:** The Chair puts the amendment to a voice vote (*"Ayes" vs. "Noes"*). If challenged, a Division
(recorded vote) is held.

4. **Adoption:** If adopted, the amended text becomes part of the Clause; the Chair then puts the amended
